

Questions You'd Like To Ask But Is Shy To Ask

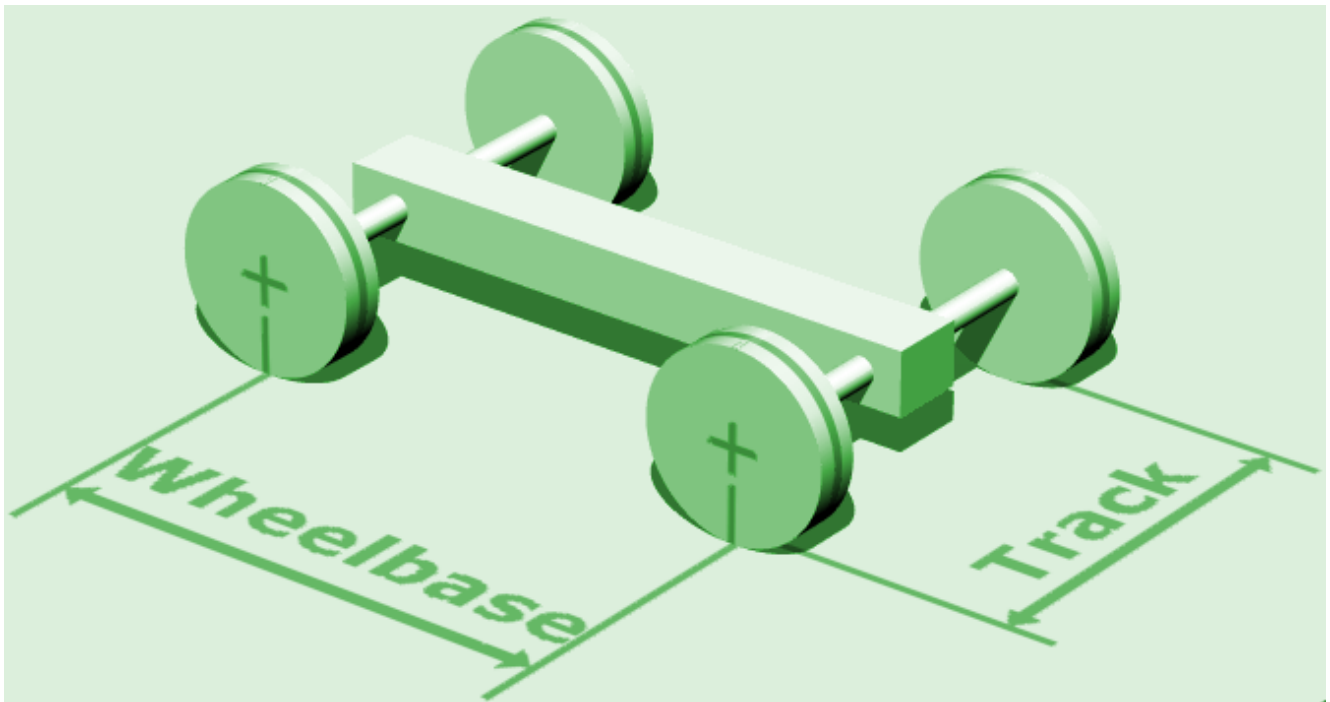

Don't worry we're not judgemental*, we know you're an idiot when you don't ask and when it's obvious you don't know what you're talking about. Like the old folks said; "The less you know, the more you think you know". So ask way, don't be bashful our mission is to shape you to become better Filipino (or Filipina), asking is a true gentleman's way out of mediocrity. Here are some of the shy-type questions our "angas" boys are afraid to ask:

Is T-Bar shifter only used for cars with automatic transmission? No. T-bar shifter can be used for both manual and automatic, some drivers like it on manual some drivers don't.

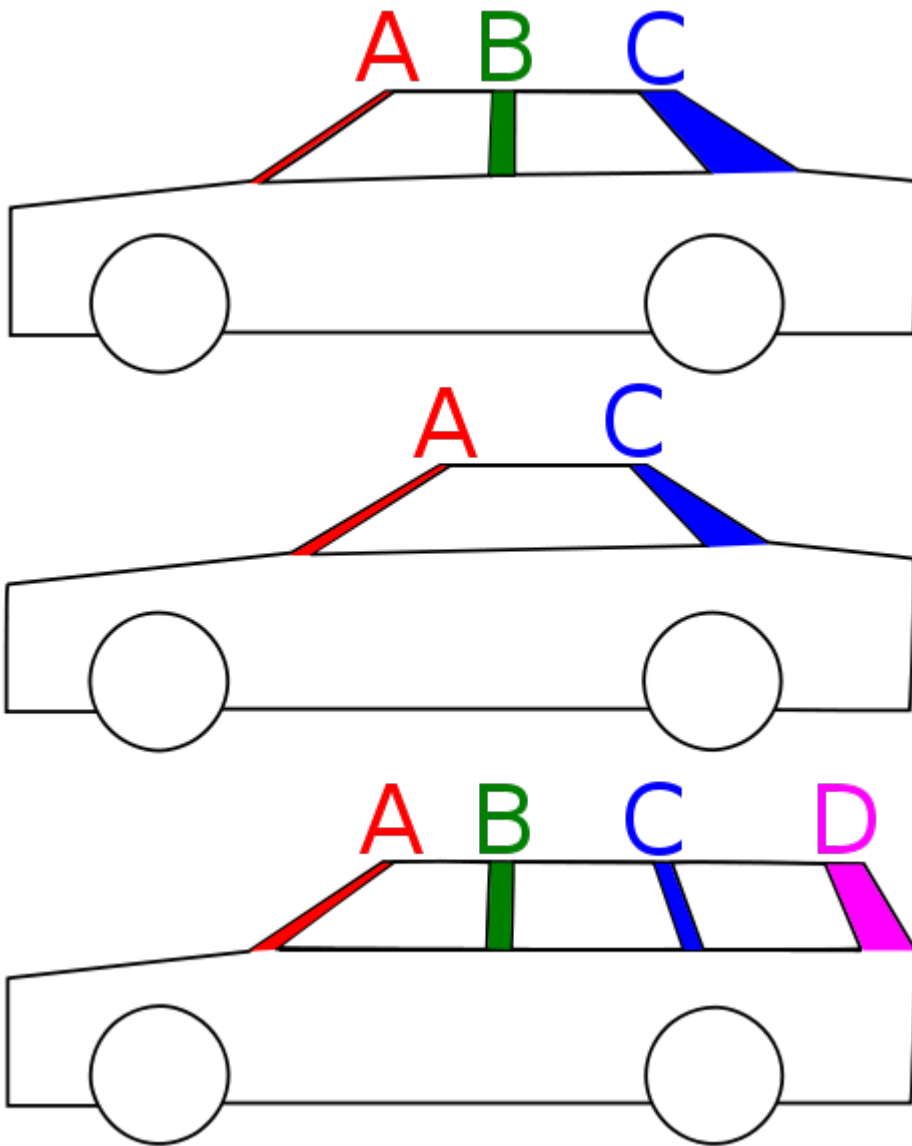

A T-Bar shifter on a manual

I've been hearing about wheelbase, what the heck is that? The **wheelbase** is the distance between the centers of the front and rear wheels. Why is this important? Because sooner or later you'll stumble on car emblems that has "SW" for Short Wheelbase or "K" for Kompessor which loosely has the same meaning, "L" or "LW" for Long Wheelbase. Each has its advantages like stability or maneuverability.

Something to brag on your next Physics class

What is A, B, C Pillars? I've been reading that from magazines but they're not giving details! **Pillars** are the vertical or near vertical supports of an automobile's window area—designated respectively as the A, B, C or D-pillar moving in profile view from the front to rear.

Learned something? Then “like” it. Got more questions? Then post a comment below.
